

Botco.ai Invited as Finalist for Prestigious 2025 KPMG Private Enterprise Tech Innovator in the US

Botco.ai's invitation highlights its pioneering AI Agents, compliance-first architecture, and measurable impact in healthcare and beyond

Scottsdale, AZ — Botco.ai, a trusted GenAI leader in the healthcare and enterprise sectors, was honored to be invited as a finalist for the 2025 KPMG Private Enterprise Tech Innovator in the US competition—a testament to the company's innovation and market impact.

“Being invited as a finalist isn’t just recognition—it’s a powerful validation of our innovation, responsible AI approach, and the measurable impact our technology brings,” said Rebecca Clyde, CEO and co-founder of Botco.ai. “This invitation also connects us with mentors, industry leaders, and fellow visionaries—an unmatched chance to refine our strategy, elevate our positioning, and accelerate our mission.”

Botco.ai stood out by pioneering specialized AI Agents built on a Retrieval-Augmented Generation (RAG) framework—trained for specific tasks such as clinical support, patient referrals, and CRM workflows. These domain-specific Agents embed directly into CRMs, CMSs, EHRs/EMRs and more, scaling seamlessly while delivering compliance-first architecture, including HIPAA, SOC 2, GDPR, and CCPA privacy standards, and minimizing hallucinations through fine-tuned models and proprietary data ingestion.

“Within healthcare, our Agents power use cases ranging from symptom triage and medical FAQ and appointment scheduling to benefits verification, behavioral health support, and clinical trial enrollment—delivering real, measurable ROI,” added Clyde. “Whether it’s reducing behavioral health call volumes by 40%, accelerating clinical trial enrollment, or delivering over 1,000% incremental revenue, our impact speaks volumes.”

Botco.ai’s platform also offers an enterprise-ready AI Playground for testing and refining chatbots using proprietary content before deployment—enhancing chatbot accuracy, contextual relevance, and reducing support load upon launch.

“As part of a global cohort of problem-solving innovators, we’re honored to have expanded our visibility and credibility,” Clyde continued. “Being invited to represent the US in Lisbon this November would further elevate our mission—driving accessible, ethical AI that empowers healthcare, government, and beyond.”

About Botco.ai

Botco.ai is the Enterprise AI Agent Platform purpose-built for organizations that need to engage customers through intelligent, reliable, and secure AI Conversations. The platform enables enterprises to seamlessly create, securely deploy, and easily manage autonomous AI agents using a no-code development environment (IDE) and retrieval-augmented generation (RAG) technology.

Trusted by leading healthcare, behavioral health, and pharmaceutical organizations, Botco.ai empowers businesses to convert conversations into revenue, reduce operational costs, and improve customer satisfaction. Recognized as “Most Outstanding Startup” by the Arizona Innovation Challenge and winner of the TiE50 and ACA Best SaaS Platform awards, Botco.ai is redefining how enterprises engage with their audiences through agentic AI.
